Fumidori
ふみどり

FOR JAPANESE LANGUAGE SCHOOLS

Kanji for your students, outside class too

Fumidori ふみどり is a free Android app that helps your students learn and review kanji at their own pace, in English or Spanish: by understanding their logic, writing them by hand and reading them in real sentences.

札

Complete content

300 kanji: all of N5 and N4 plus early N3. 625 words with example sentences and furigana, animated stroke order, parts and radicals, and memory tips.

練

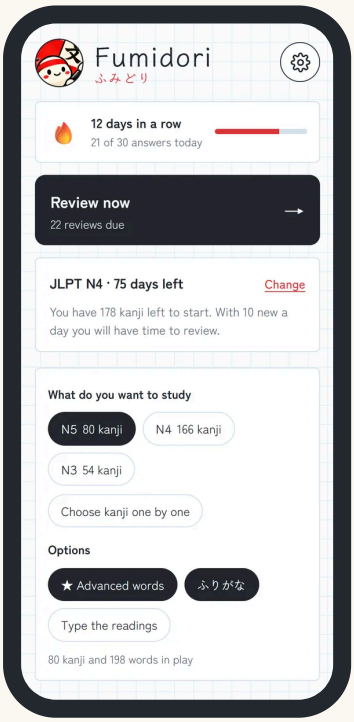

Varied practice

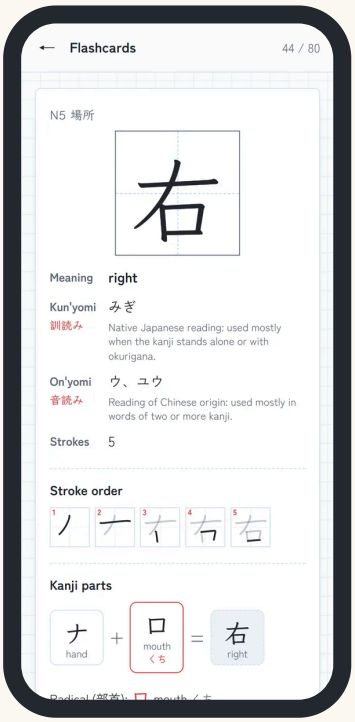

Reading, choosing the kanji, look-alike kanji, parts, building words, listening, marked handwriting, 20 short readings and scored exams.

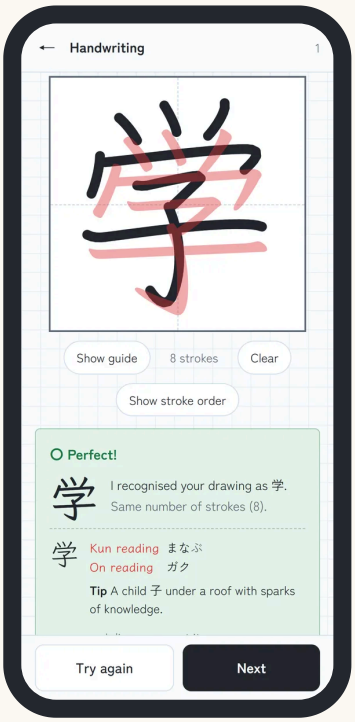

復

Smart review

Spaced repetition with daily limits. The plan adapts to each student's goal: the JLPT and its date, school or life in Japan.

How a school can use it

1. **The student chooses “I study at a Japanese school”** and their class level. The app prepares their plan.
2. **The teacher creates a list of the week's kanji** in the app itself and shares it by LINE, WhatsApp or email.
3. **The student pastes the message** and those kanji come first in their practice and reviews.
4. **The student can create an image of their progress** (streak, levels and class kanji) and send it to the teacher if they wish.

Privacy

No accounts, no ads, no analytics and no internet needed. Fumidori collects no data at all: progress stays on the student's phone. There is nothing to sign or set up. Privacy policy: https://john141423.github.io/fumidori-privacy/

Key facts

Platform	Android (Google Play, coming soon)	Languages	English and Spanish
Price	Free, no ads	Connection	Works offline
Developer	Jonatan Ramos Pastrana (Japan)	Contact	fumidori.app@gmail.com

Our proposal

We are looking for a school to try Fumidori with its students before launch. It is free, and your feedback will shape the next versions: more kanji, more exercises and whatever your classes need.

Fumidori is an independent app. Levels N5–N3 refer to the Japanese-Language Proficiency Test (JLPT); Fumidori is not affiliated with its organisers.
